

VIDEO LIBRARY

EVIDENCE-BASED CONTINUING EDUCATION ON SURGICAL PATIENT & STAFF SAFETY

Over 40 video-based educational courses designed to increase competency and implementation of best practices in the perioperative environment.

Earn Contact Hours: Contact Hours vary per course. The full library offers 50+ CH upon completion of the courses and evaluations.

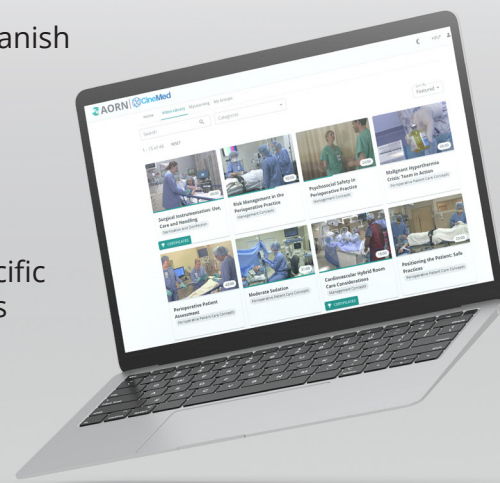

Optimized for Mobile Viewing: Access videos on any device, whether on a desktop or on the go. Now with closed captions, note-taking, and Spanish translations.

Study Guides & Posttests: Each course includes a written overview to aid learning and a multiple-choice exam to assess competency and gain improvement insights.

Easy Assignment & Reporting: Facility administrators can assign specific courses with start and due dates as well as view course completion status and completion date for each learner.

Flexible Pricing Options: Provide access to unlimited users with a facility subscription or to a select number of users with per-learner subscription options.

Supportive Resources: Access an instructional course and guides to get started quickly.

Who can benefit from the Video Library?

- Registered nurses (RNs) in perioperative onboarding programs
- New and experienced RNs transitioning to the perioperative suite
- Sterile processing team members
- Non-RN perioperative team members
- RNs involved in operative/invasive procedures in non-traditional OR settings
- Nursing students
- Nurse managers and educators
- Hospital networks

Nurturing the surgical team with professional development opportunities can help improve safety and quality in the O.R. and increase staff retention.
