

# Perioperative Clips

## Support surgical staff with evidence-based quick reference

Over 90 concise instructional videos designed to improve competency and workflow efficiency.

**Essentials in Minutes:** Each video explains the “how-to” for topics including surgical draping, positioning, prepping, tourniquet care, and more in just about 1 minute.

**Optimized for Mobile Viewing:** Access videos on any device, whether on a desktop or on the go. Videos include closed captions, note-taking, and Spanish translations.

**Easy Assignment & Reporting:** Facility administrators can assign specific clips with start and due dates as well as view clip completion status and completion date for each learner.

**Flexible Pricing Options:** Provide access to unlimited users with a facility subscription or to a select number of users with per-learner subscription options.

**Supporting Resources:** Access an instructional guide to get started quickly.

---

### Who can benefit from Perioperative Clips?

Perioperative Clips are designed to provide a refresher on the clinical content and is not intended to replace comprehensive training on these activities.

- Registered nurses (RNs) in perioperative onboarding programs
- New and experienced RNs transitioning to the perioperative suite
- Sterile processing team members
- Non-RN perioperative team members
- RNs involved in operative/invasive procedures in non-traditional OR settings
- Nursing students
- Nurse managers and educators
- Hospital networks
